CALABASH PULSE

AI doesn't stand still.
Neither should your team.

Live monthly training. Practical expert guidance. Learning tailored to your team.

An ongoing, expert-led programme that keeps your organisation up to speed with AI and helps your people turn emerging capabilities into better ways of working. Each month combines relevant developments with practical training, live discussion and your team's questions.

MONTHLY

Live, instructor-led learning that evolves with AI.

NON-TECHNICAL

Clear, accessible training for everyday work.

TAILORED

Your tools, questions and business priorities.

LEARNER OBJECTIVE

"I can stay current with AI, apply useful new capabilities and develop my skills as technology and business needs evolve."

FOUR WAYS PULSE SUPPORTS YOUR TEAM

01 The AI Pulse Briefing

Understand what is changing, what matters and which new capabilities are worth exploring.

02 Practical skills & technology

Live demonstrations and guided application of new models, features and working methods.

03 Expert Q&A & problem-solving

Bring real questions and challenges. Explore approaches with an experienced instructor.

04 Bespoke learning & priorities

Shape part of the agenda around your organisation's tools, skills gaps and business needs.

Fresh insight every month. Practical learning that moves with your business.

LEARNING THAT KEEPS MOVING

A SIMPLE MONTHLY RHYTHM

An ongoing programme shaped around your people, tools and priorities.

01	**We listen**	Understand your tools, current capability, questions and priorities.
02	**We curate**	Select AI developments and practical learning relevant to your team.
03	**We teach**	Learn live through expert insight, demonstrations and application.
04	**We explore**	Discuss real challenges and incorporate agreed bespoke topics.
05	**We build**	Develop knowledge, confidence and practical capability over time.

PRACTICAL LEARNING OUTCOMES

Through the ongoing programme, participants develop the ability to:

Recognise relevant developments
Identify new AI capabilities that could help with everyday work.

Use emerging capabilities
Apply useful tools, features and techniques through practical learning.

Exercise sound judgement
Consider limitations, check results and use information responsibly.

Work through real questions
Explore challenges and possible approaches with expert guidance.

Spot opportunities to improve work
Identify tasks and workflows that could benefit from AI support.

Keep developing practical skills
Build on earlier learning as tools and business priorities change.

WHO IT'S FOR

Teams already using AI, organisations investing in AI tools, adoption leaders and learning teams who want to maintain momentum after initial training.
